

AR-CPAC - Aruba ClearPass Advanced Configuration

Dieser Kurs ersetzt: Aruba Advanced ClearPass Troubleshooting & Solutions (AACTS)

This advanced level course is taught as a workshop. Participants will be led through a real-world design and implementation scenario encompassing all aspects of the ClearPass security product. This 5 day course will cover the design, implementation and troubleshooting of ClearPass solutions. The course is presented as a workshop, meaning that it is focused on student participation and hands-on labs to reinforce concepts, through design exercises and lab debriefs as well as planning and implementation of the design. This is not a course that relies on a step by step lab guide and you will be challenged to find creative solutions to the scenario and by the nature of this workshop you will master troubleshooting techniques in ClearPass.

ARUBA Kurse führen wir mit unserem zertifizierten Partner der Fast Lane GmbH durch.

Inhalte

This advanced course uses a real-world case study on which participants will learn how to design, deploy and troubleshoot several aspects of the ClearPass security product. This 5-day training is focused on active student participation, design exercises, introduction of new features and hands-on labs.

The lectures introduce different customer requirements and explain the fundamentals under the technologies required to fulfill them, while the lab guide displays the entire process from planning all the way up to implementation, testing and troubleshooting if required. Through this process the candidates will acquire skill sets that prepare them to face any challenging scenario.
