Inhalte

Der ECIH Kurs findet in deutscher Kurssprache mit englischen Herstellerunterlagen und englischem Examen statt.

- **Learning Objectives of the ECIH Program**
 - Understand the key issues plaguing the information security world
 - Learn to combat different types of cybersecurity threats, attack vectors, threat actors and their motives
 - Learn the fundamentals of incident management including the signs and costs of an incident
 - Understand the fundamentals of vulnerability management, threat assessment, risk management, and incident response automation and orchestration
 - Master all incident handling and response best practices, standards, cybersecurity frameworks, laws, acts, and regulations
 - Decode the various steps involved in planning an incident handling and response program
 - Gain an understanding of the fundamentals of computer forensics and forensic readiness
 - Comprehend the importance of the first response procedure including evidence collection, packaging, transportation, storing, data acquisition, volatile and static evidence collection, and evidence analysis
 - Understand anti-forensics techniques used by attackers to find cybersecurity incident cover-ups
 - Apply the right techniques to different types of cybersecurity incidents in a systematic manner including malware incidents, email security incidents, network security incidents, web application security incidents, cloud security incidents, and insider threat-related incidents
- Module 01 Introduction to Incident Handling and Response
- Module 02 Incident Handling and Response Process
- Module 03 Forensic Readiness and First Response
- Module 04 Handling and Responding to Malware Incidents
- Module 05 Handling and Responding to Email Security Incidents
- Module 06 Handling and Responding to Network Security Incidents
- Module 07 Handling and Responding to Web Application Security Incidents
- Module 08 Handling and responding to Cloud Security Incidents
- Module 09 Handling and Responding to Insider Threats

Zielgruppe

There is no organization that is truly safe from a cyberattack. An Incident Manager with the proper incident handling skills can help reduce the impact of a breach.

The incident handling skills taught in E|CIH are complementary to the job roles below as well as many other cybersecurity jobs:

- Penetration Testers
- Vulnerability Assessment Auditors
- Risk Assessment Administrators
- Network Administrators
- Application Security Engineers
- Cyber Forensic Investigators/ Analyst and SOC Analyst
- System Administrators/ Engineers
- Firewall Administrators and Network Managers/IT Managers

Voraussetzungen

One year of experience managing Windows/Unix/Linux systems or have equivalent knowledge and skills, good understanding of common network and security services is required.

Prüfung/Zertifizierung

EC-Council Certified Incident Handler (CIH) Examen 212-89
Multiple-Choice Prüfung mit 100 Fragen, Dauer 3 Stunden
ECC Examensgebühr im Kurspreis enthalten.

Die ECC Examen werden je nach Kurs entweder direkt am Seminarendenachmittags oder zu einem späteren Zeitpunkt absolviert.
Informationen hierzu erhalten Sie nach Buchung.
