 - Understanding, Applying, and Enforcing Software Security

CISSP was the first credential in the field of information security to meet the stringent requirements of ANSI/ISO/IEC Standard 17024.

Course Information

Objectives

This course is designed for information security professionals with deep technical and managerial knowledge and experience to effectively design, engineer and manage the overall security posture of an organization. This training course provides a comprehensive review of information systems security concepts and industry best practices, covering the following eight domains of the CISSP Common Body of Knowledge (CBK®).

Audience

- The CISSP is ideal for experienced security practitioners, managers and executives interested in proving their knowledge across a wide array of security practices and principles, including those in the following positions:
 - Chief Information Security Officer
 - Chief Information Officer
 - Director of Security
 - IT Director/Manager
 - Security Systems Engineer
 - Security Analyst
 - Security Manager
 - Security Auditor
 - Security Architect
 - Security Consultant
 - Network Architect
-

Requirements

- **Requirements and preparation for attending the course: Business English**
 - Prepare yourself for the course in self-study.
 - CISSP books are only available in English and are not part of the course. For the course you will receive a training manuscript in English specially prepared by the instructor. Preparation for the course and after the course for the self-study exam is essential! Please note the speakers' valuable tips for exam preparation. Only register for the exam date after the course! Only then can you estimate how much reworking you still need for the exam!

Experience Required: Candidates must have a minimum of five years cumulative paid work experience in two or more of the eight domains of the CISSP CBK. Earning a four year college degree or regional equivalent or an additional credential from the (ISC)2 approved list will satisfy one year of the required experience. Education credit will only satisfy one year of experience.

A candidate that doesn't have the required experience to become a CISSP may become an Associate of ISC2 by successfully passing the CISSP examination. The Associate of ISC2 will then have six years to earn the five years required experience.
